

# Carbon Reduction Plan

---

## QuickThink Cloud Limited

Publication date	26 March 2026
Reporting basis	UK operations only, in line with PPN 006

## Commitment to achieving Net Zero

QuickThink Cloud Limited is committed to achieving Net Zero emissions by 2050. *This Carbon Reduction Plan has been prepared in accordance with PPN 006 and relates to the company's UK operations.*

## Company operating profile

- QuickThink Cloud Limited is a small cloud hosting and support business operating primarily on a remote-working basis.
- The company uses a registered office address for company administration but does not operate a staffed office environment as part of normal service delivery.
- The company does not operate a vehicle fleet, does not manufacture goods, and does not undertake warehousing, freight, or logistics activities.
- During the baseline and current reporting years, the company recorded no business travel and no routine employee commuting to a company workplace for service delivery.

## Baseline emissions footprint

**Baseline year:** 2023

**Additional details relating to the baseline emissions calculations:** 2023 is the company's baseline year for formal Carbon Reduction Plan reporting. The business model was materially the same as at the current reporting year: remote-first delivery, no company fleet, no physical product transportation, and no business travel. The registered office was used for company administration only and not as a routinely occupied delivery site. On that basis, the company assessed its baseline emissions as nil across Scope 1, Scope 2 and the required PPN 006 Scope 3 categories.

Baseline year emissions	tCO2e
Scope 1	0.00
Scope 2	0.00
Scope 3 (required included sources)	0.00
Total emissions	0.00

### Included Scope 3 categories

Category	tCO2e	Basis
Business travel	0.00	No business travel recorded
Employee commuting	0.00	Remote delivery model; no routine commuting to company workplace
Waste generated in operations	0.00	No separately controlled operational waste stream at registered office
Upstream transportation and distribution	0.00	No physical goods received for operational delivery
Downstream transportation and distribution	0.00	No physical goods distributed to customers

### Current emissions reporting

**Reporting year:** 2025

**Method statement:** The current reporting year reflects the same operating model as the baseline year. The company remained remote-first, recorded no business travel, operated no fleet, and did not undertake physical logistics or manufacturing activity. The registered office continued to be used for company administration rather than as a routinely occupied operational workplace. Accordingly, current year emissions were assessed as nil for the purposes of this plan.

Current reporting year emissions	tCO2e
Scope 1	0.00
Scope 2	0.00
Scope 3 (required included sources)	0.00
Total emissions	0.00

### Emissions reduction targets

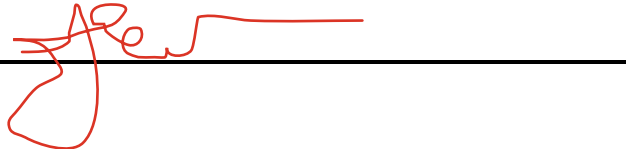

Given the company's current near-zero operational footprint, QuickThink Cloud Limited's near-term objective is to maintain this low-emission operating model while continuing to review its reporting methodology annually. The company will continue to avoid unnecessary travel, maintain remote-first service delivery where practical, and review whether any future changes to premises use or operational activity require revised carbon accounting.

### Carbon reduction projects

- Remote-first service delivery to reduce commuting and travel demand.

- Use of digital collaboration, support, and document workflows in place of physical meetings and paper-heavy processes.
- Procurement and refresh of energy-efficient IT equipment as part of normal business operations.
- Annual review of business activities to identify any change that would create reportable emissions within Scope 1, Scope 2 or the required Scope 3 categories.

### Declaration and sign-off

<b>Declaration</b>	<p>This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.</p> <p>Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate government emission conversion factors for greenhouse gas company reporting.</p> <p>Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.</p> <p>This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).</p>
Name	Ian Witts
Job title	Director
Signed on behalf of the supplier	
Date	26 March 2026

**Note:** If the company begins occupying premises as a normal workplace, purchases utilities directly for such premises, undertakes business travel, or introduces physical logistics activity, this plan will be updated in the next reporting cycle to reflect that change.
